About nine o'clock Priday morning the residents in the village were startled by the report of some ex-plosion. Upon investigation it was found that the United States Finish-ing company had just received a 16-paired drying can which was placed of the platform of the storehouse of the company for testing purposes when the end of the can blew out without causing any injuries. The company recently shipped the can off the repaired and having just received the same it was thought best to give it a test. Steam was put into the can with the result that the end the can with the result that the end blew out. The end flew across the warehouse platform, tearing a hole in one of the mill fences, but otherwise there was no damage. The report of the explosion was heard for some distance and many of the residents looked for a bad accident.
